

## Multi-purpose Polymer-based Primer Crystallisation Agent & Solutions for Concrete Shrinkage Crack

### DESCRIPTION :

**BEBOND BBPRIME** is formulated as a polymer based primer best uses for surface preparation. Also, with high penetration ability. **BEBOND BBPRIME** effectively serve as a solution for water leaking issues arises from concrete shrinkage crack.

### ADVANTAGES

#### For Surface Preparation

- Effective, easy solution for dusty and powdery surface
- Excellent and high penetration into cement based surface
- Durability - UV and weather resistant, water repellent ability
- Flexibility - Good in film forming and binding properties

#### For solution on concrete shrinkage crack (to terminate water leaking)

- Effective and permanent solution for water leaking on shrinkage crack
- Enormous time and cost saving when eliminates hustle extra work on hacking
- Clean and simplicity solutions for applicator and contractor

# BEBOND BBPRIME

CRYSTALLIZATION  
DE-DUST AGENT

WATER  
REPELLENT AGENT

GRAVITY LIQUID  
IMMERSION SYSTEM  
(GLIS)

UV RESISTANT

## PRODUCT DATA SHEET

Color	Blue, Clear
Packaging	5, 20 litres / pail
Form	Water based liquid
Drying Time	Approximately 15 minutes
Open Time	14 days
Toxicity	None
Shelf Life	1 year ( 12 months ) Dry conditions at ambient temperature
Storage	Store in protected area ( 5-37 celsius )
Coverage	Approximately 9-13m <sup>2</sup> /L subject to type of substrate
Application Tool	Paint Roller

## USAGE

### Prior to Tiles Installation

- Treat powdery substance on tiles base surface (receiving adhesive surface)
- Treat Painted, skim coated and chipped surface for tiles installation

### Prior to RC/Shear Wall Plastering

- Treat on RC / Shear wall plaster surface

### Prior to Waterproofing membrane

- Treat pin holes on the concrete substrate prior to waterproofing

### Prior to application on Light weight block / cemboard surface

- Treat powdery substance on light weight block / cemboard surface

### Solutions On Concrete Shrinkage Crack

Immersion System for water leaking issue

- Effective and permanent solution for terminating water leaking issues on concrete shrinkage crack

## BEBOND BBPRIME TO CRYSTALIZE SUBSTRATE

Without BEBOND BBPRIME

After Treated WITH BEBOND BBPRIME

## APPLICATION PROCEDURE

### FOR SURFACE PREPARATION

- Apply **BEBOND BBPRIME** with roller directly immerse on the cement based surface.
- Ready to use from opened cap, apply with paint roller.

### FOR SOLUTIONS ON CONCRETE SHRINKAGE CRACK

- Prepare a media of immersion system, eg: Pipe Sleeve with socket or modified bucket. In reliable on the gravity pressure given from the media/equipment of immersion, resulting the time taken for **BEBOND BBPRIME** to fully penetrate and immerse into the concrete shrinkage crack, in order to terminate water leaking issues from concrete slab to soffit area.
- Ready to use from opened cap, pour directly into the media of immersion system.

## HEALTH & SAFETY

This product is non-toxic. In cases of allergic and sensitive skin contact, flush and clean with water. If severe medical reaction happened please seek for professional help.
